

Member preferential rates

(As at 1705v01)

Herewith the current member preferential rates in two categories 'Web Development' and Internal Training'

Unless it is a special promotion, please do not make preferential rates known to non-members. Rates are only for members as this resonates with the entire purpose of Signo to help a certain segment in the market developing the brand, purpose, potential as helpers.

All members who join during this development phase (SIGNOPRO 2.0) will be graded rates above and beyond Elite rates. The 'Special Rate' reference is applicable to you.

For the sake of simplicity we do not list all prices and examples.

More on pricing on the website but remember those are for the open market and you will have to clarify the price with us.

At this stage (SIGNOPRO 2.0) makes it really easy since the reduced membership tariff of R200 automatically works with the Elite members level value.

Rates below with decimals will be rounded. All rates are Rand Value

NB: In addition to the below please see www.signo.co.za/spdservices
